Health and Safety Course #202

Field inspections involve a certain degree of risk. Inspections of wastewater treatment plants, manufacturing plants, chemicals and power generation are each associated with various hazards. A safe field inspection depends on the recognition, evaluation and control of hazards. Cal/OSHA regulations and established safety policies are continually being updated. This course/manual has been assembled as a "hands-on" tool for all personnel conducting field activities.

May 12, 2010

8:30 am – 3:00 pm

**California Air Resources Board
1001 I Street, 5th floor (Training Room 5)
